This application is up for consideration.

A. In view of the complexity of the issues in the claimed inventions, this Office action is made.

B.1. Claims 1-19 are generic to a plurality of disclosed patentably distinct species comprising many possible chemical structures of the general formula I side chain as broadly disclosed in the art. Applicant is required under 35 U.S.C. 121 to elect a single disclosed chemical structure species for an initiation of a search, even though this requirement is traversed. Applicants are requested and required to precisely disclose the elected chemical structure with (1) all bonding connections between and among all chemical ingredients and (2) listing of all chemical elements and their positions in the elected chemical structure for a precise consideration and search. No consideration or search will be made until these request and requirement are properly and fully met. It is now notified for the record.

2. Claims 1-19 are generic to a plurality of disclosed patentably distinct species comprising many possible repeating unit chemical structures of the general alkali-soluble polymerizable polymers as broadly disclosed in the art. Applicant is required under 35 U.S.C. 121 to elect a single disclosed repeating unit chemical structure species for an initiation of a search, even though this requirement is traversed. Applicants are requested and required to precisely disclose the elected chemical structure with (1) all bonding connections between and among all chemical ingredients and (2) listing of all chemical elements and their positions in the elected chemical

structure for a precise consideration and search. No consideration or search will be made until these request and requirement are properly and fully met. It is now notified for the record.

3. Claims 1-19 are generic to a plurality of disclosed patentably distinct species comprising many possible chemical structures of the general sensitizing dye as broadly disclosed in the art. Applicant is required under 35 U.S.C. 121 to elect a single disclosed chemical structure species for an initiation of a search, even though this requirement is traversed. Applicants are requested and required to precisely disclose the elected chemical structure with (1) all bonding connections between and among all chemical ingredients and (2) listing of all chemical elements and their positions in the elected chemical structure for a precise consideration and search. No consideration or search will be made until these request and requirement are properly and fully met. It is now notified for the record.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

C. No restriction requirement under 35 U.S.C. 121 is made between groups of claims (1-18) and (19). Therefore, no separate consideration or search is made. Claim 19 is permitted to be rejoined with at least claim 1 when claim 1 is found to be allowable over a prior art. Should applicants disagree, urge or show otherwise in the next response to this Office action in order for it to be considered timely, a restriction will be made for the record as urged or shown.

D. A consideration or search for all or many or several or more than one reasonable rejected species at one time is burdensome, lacks of focus on many and all issues in the claimed inventions and dilutes patentability of many and all issues in many inventions than those in one. Applicant should show or provide a convincing evidence to the contrary. In the absence of convincing evidence, the restriction would not be removed.

E. Applicant is advised that the reply to this requirement to be complete must include an election as set forth on the record to be examined even though the requirement be traversed (37 CFR 1.143).

F. Other issues have not been considered until a proper election is made and resolved all of the requirements as clearly pointed out and set forth above.

G. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa V. Le whose telephone number is 571-272-1332.

The examiner can normally be reached from 6:30 AM to 4:00 PM on Monday through Thursday and about the same time of most Friday.
